

ARCHER DIESEL PERFORMANCE ADDITIVE (DPA)

Archer Diesel Performance Additive (DPA) is a multi-functional diesel fuel additive formulated to provide improved performance and winter operability in today's diesel engines. Archer DPA provides complete injector cleanliness protection and a cetane boost for faster starts and smoother combustion. Cold-temperature operability is greatly improved through its superior cold filter plugging point (CFPP) and wax anti-settling performance components. For best wintertime results, Archer DPA should be added to fuel in early fall when fuel temperatures are still above 32°F.

TREAT RATE OPTIONS FOR BULK, DRUMS, & 2.5 GALLON

1:1,500: DW10 Injector Cleanliness Level

1:1,000: "Keep Clean" & Winter Operation

1:500: Chronic Clean-up & Severe Weather: Pour directly into the tank and add fuel second.

TREAT RATE OPTIONS FOR QUARTS

1 Quart: 185 Gallons: DW10 Injector Cleanliness Level

1 Quart: 125 Gallons: "Keep Clean" & Winter Operation

1 Quart: 60 Gallons: Chronic Clean-up & Severe Weather: Pour directly into the tank and add fuel second.

TYPICAL SPECIFICATION DATA

ARCHER DIESEL PERFORMANCE ADDITIVE	
Viscosity @ 40°C (cSt)	5.5
Density (lb/gal)	7.70
Pour Point (°C)	-52
Pour Point (°F)	-61
Flash Point (°C)	56
Flash Point (°F)	132
Nitrogen (% mass)	2.2
Shelf life (months)	36

ARCHER DPA
