

ARCHER GOLD SYNTHETIC MULTI-VEHICLE AUTOMATIC TRANSMISSION FLUID (ATF)

Archer Gold Synthetic Multi-Vehicle ATF is a full synthetic transmission fluid with a high-performance additive package. Compared to conventional ATFs, this advanced formulation provides superior performance benefits, including low-temperature oil flow, enhanced wear protection, improved viscosity and frictional stability, and better resistance to thermal breakdown.

FEATURES & BENEFITS

- Controlled friction properties provide operators with smooth and efficient transmission of power across all normal temperature ranges
- Excellent lubricating characteristics offer quieter operation, smoother shifting, and excellent wear protection
- Offers exceptional oxidation stability and resistance to chemical deterioration
- Features enhanced viscosity stability (high viscosity index) to help assure adequate lubrication without excessive thinning in severe high-temperature service or thickening at low starting temperatures
- Provides superb protection against rusting and corrosion, including special protection for soldered fittings
- Offers excellent resistance to foaming
- Provides long fluid life and long transmission life
- Compatible with common transmission seal materials
