

ARCHER TURBINE DRIP OIL

Archer Turbine Drip Oil is a light-bodied oil developed specifically to lubricate the bearings found in deep well turbine pumps. It adheres to metal surfaces of irrigation systems to provide outstanding rust protection and lubrication under wet operating conditions.

A high viscosity index base oil provides a constant drip over a wide temperature range. Archer Turbine Drip Oil is designed to have extremely good low-temperature fluidity to ensure proper lubrication of the critical lower bearings. It also exhibits high lubricity which provides superior wear protection.

TYPICAL SPECIFICATION DATA

ARCHER TURBINE DRIP OIL	
ISO GRADE	22
Viscosity @ 100°C (cSt)	4.5
Viscosity @ 40°C (cSt)	22.8
Viscosity Index	110
Density (lb/gal)	7.00
Pour Point (°C)	-15
Pour Point (°F)	5
Flash Point (°C)	190
Flash Point (°F)	374

ARCHER TURBINE DRIP OIL
